#### **DETAILED ACTION**

# **Drawings**

The drawings are objected to because Figs 1A, 1B are not different figures, but different elements. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or 'New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations of claim 11, including a shelf of <u>any shape</u> must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Art Unit: 3637

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Objections

Claims 3, 6, 7, 1, 15 are objected to because of the following informalities: Claims 3, 6, 7, 9, 14, 15 are objected to since they do not end a period. Appropriate correction is required.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3637

Claims 9, 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 9, 10 The expression "...claim 1 or in said..." is unclear and indefinite. Clarification and correction are required.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Rothing. The patent to Rothing teaches structure as claimed including a main support having a front surface, a shelf (10).

#### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 3637

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 2, 5, 6, 10, 11, 12, 13, 14, 15, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rothing. The patent to Rothing teaches structure substantially as claimed, as discussed above, including a front surface, shelf, of a size and shape. The shape and size of the shelf member is a matter of desirability which would have been obvious and well within the level of ordinary skill in the art since such limitations provide no unobvious results. The particular material of the shelf, wood, metal, glass, plastic, plexi-glass is a matter of desirability since such shelves made of such materials are commercially available and used, thereby providing structure as claimed.

Claims 3, 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rothing. The patent to Rothing teaches structure substantially as claimed as discussed above including securing means, the only difference being that the securing means is not an adhesive bonding. However, the use of adhesives for a connection is well known and commercially available in any hardware store, such as Home Depot and Lowes. Applicant is given Judicial Notice of such. Further, the patent to McKee teaches the use of adhesives to mount a shelf to be old. It would have been obvious and well within the level of one having ordinary skill in the art to modify the structure of Rothing to include an adhesive bonding as the securing means since such structures are commercially available used for the same intended purpose of providing a conventional mount and the patent to McKee teaches such structure used as an alternative conventional mounting means used in the same intended purpose, thereby providing structure as claimed.

Art Unit: 3637

#### Conclusion

Page 6

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Jensen et al, Haghayegh, Henry, Slave, Current et al teach structure similar to applicant's.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to José V. Chen whose telephone number is (703) 308-3229. The examiner can normally be reached on m-f,m-th 5:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (703)308-2168. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
